

Granville Solar Facility

Location

Granville County,
North Carolina

Capacity

2.5 MW

Fuel Resource

Photovoltaic Solar

Ownership

Southern Power

Southern Power acquired the Granville Solar Facility in October 2012.

Electricity generated by the plant serves a power purchase agreement with Progress Energy Carolinas, Inc.

Size

The Granville Solar Facility is a 2.5-megawatt solar facility located on 40 acres of private land in Granville County, North Carolina.

Technology

The 2.5-megawatt solar facility consists of polycrystalline photovoltaic solar modules manufactured by MEMC.

Southern Power, a subsidiary of Southern Company, is a leading U.S. wholesale energy provider meeting the electricity needs of municipalities, electric cooperatives, investor-owned utilities and other energy customers. Southern Power and its subsidiaries, some of which are owned in part with various partners, own or operate 50 facilities operating or under development in 13 states with more than 11,920 MW of generating capacity in Alabama, California, Delaware, Georgia, Kansas, Maine, Nevada, New Mexico, North Carolina, Oklahoma, Texas, Washington and West Virginia.

Southern Company (NYSE: SO) is a leading energy company serving 9 million customers through its subsidiaries. The company provides clean, safe, reliable and affordable energy through electric operating companies in three states, natural gas distribution companies in four states, a competitive generation company serving wholesale customers across America, a leading distributed energy infrastructure company, a fiber optics network and telecommunications services.
