

Pawpaw Solar Facility

LocationTaylor County, Georgia

Capacity 30 MW Fuel Resource Photovoltaic Solar

OwnershipSouthern Power

Southern Power acquired the 30-megawatt Pawpaw Solar Facility in May 2015. The electricity and associated renewable energy credits generated by the facility are sold under a 30-year power purchase agreement with Southern Company subsidiary Georgia Power, which will have the option to keep or sell the RECs, for the benefit of its customers or renewable energy programs.

DEPCOM Power serves as the engineering, procurement and construction contractor. Construction began in June, and the facility entered commercial operation in March 2016.

Size

The facility is located on approximately 416 acres in Taylor County, Georgia.

Technology

The project consists of approximately 137,000 multicrystalline solar modules from Trina Solar mounted on single-axis tracking tables manufactured by NEXTracker.

PV modules generate electricity directly from sunlight through an electronic process that occurs naturally in certain types of material known as semiconductors. Solar energy frees electrons in these materials to travel through an electrical circuit, powering devices or sending electricity to the grid. Tracking systems produce more energy because they track the suns movement throughout the day

Southern Power, a subsidiary of Southern Company, is a leading U.S. wholesale energy provider meeting the electricity needs of municipalities, electric cooperatives, investor-owned utilities and other energy customers. Southern Power and its subsidiaries, some of which are owned in part with various partners, own or operate 50 facilities operating or under development in 13 states with more than 11,920 MW of generating capacity in Alabama, California, Delaware, Georgia, Kansas, Maine, Nevada, New Mexico, North Carolina, Oklahoma, Texas, Washington and West Virginia.

Southern Company (NYSE: SO) is a leading energy company serving 9 million customers through its subsidiaries. The company provides clean, safe, reliable and affordable energy through electric operating companies in three states, natural gas distribution companies in four states, a competitive generation company serving wholesale customers across America, a leading distributed energy infrastructure company, a fiber optics network and telecommunications services.
